

About

Frontier Pay is a digital banking platform that lets users manage cards, view transactions, and control spending via mobile and web. It integrates with CLOUD9 and Core Banking for secure, real-time card operations.

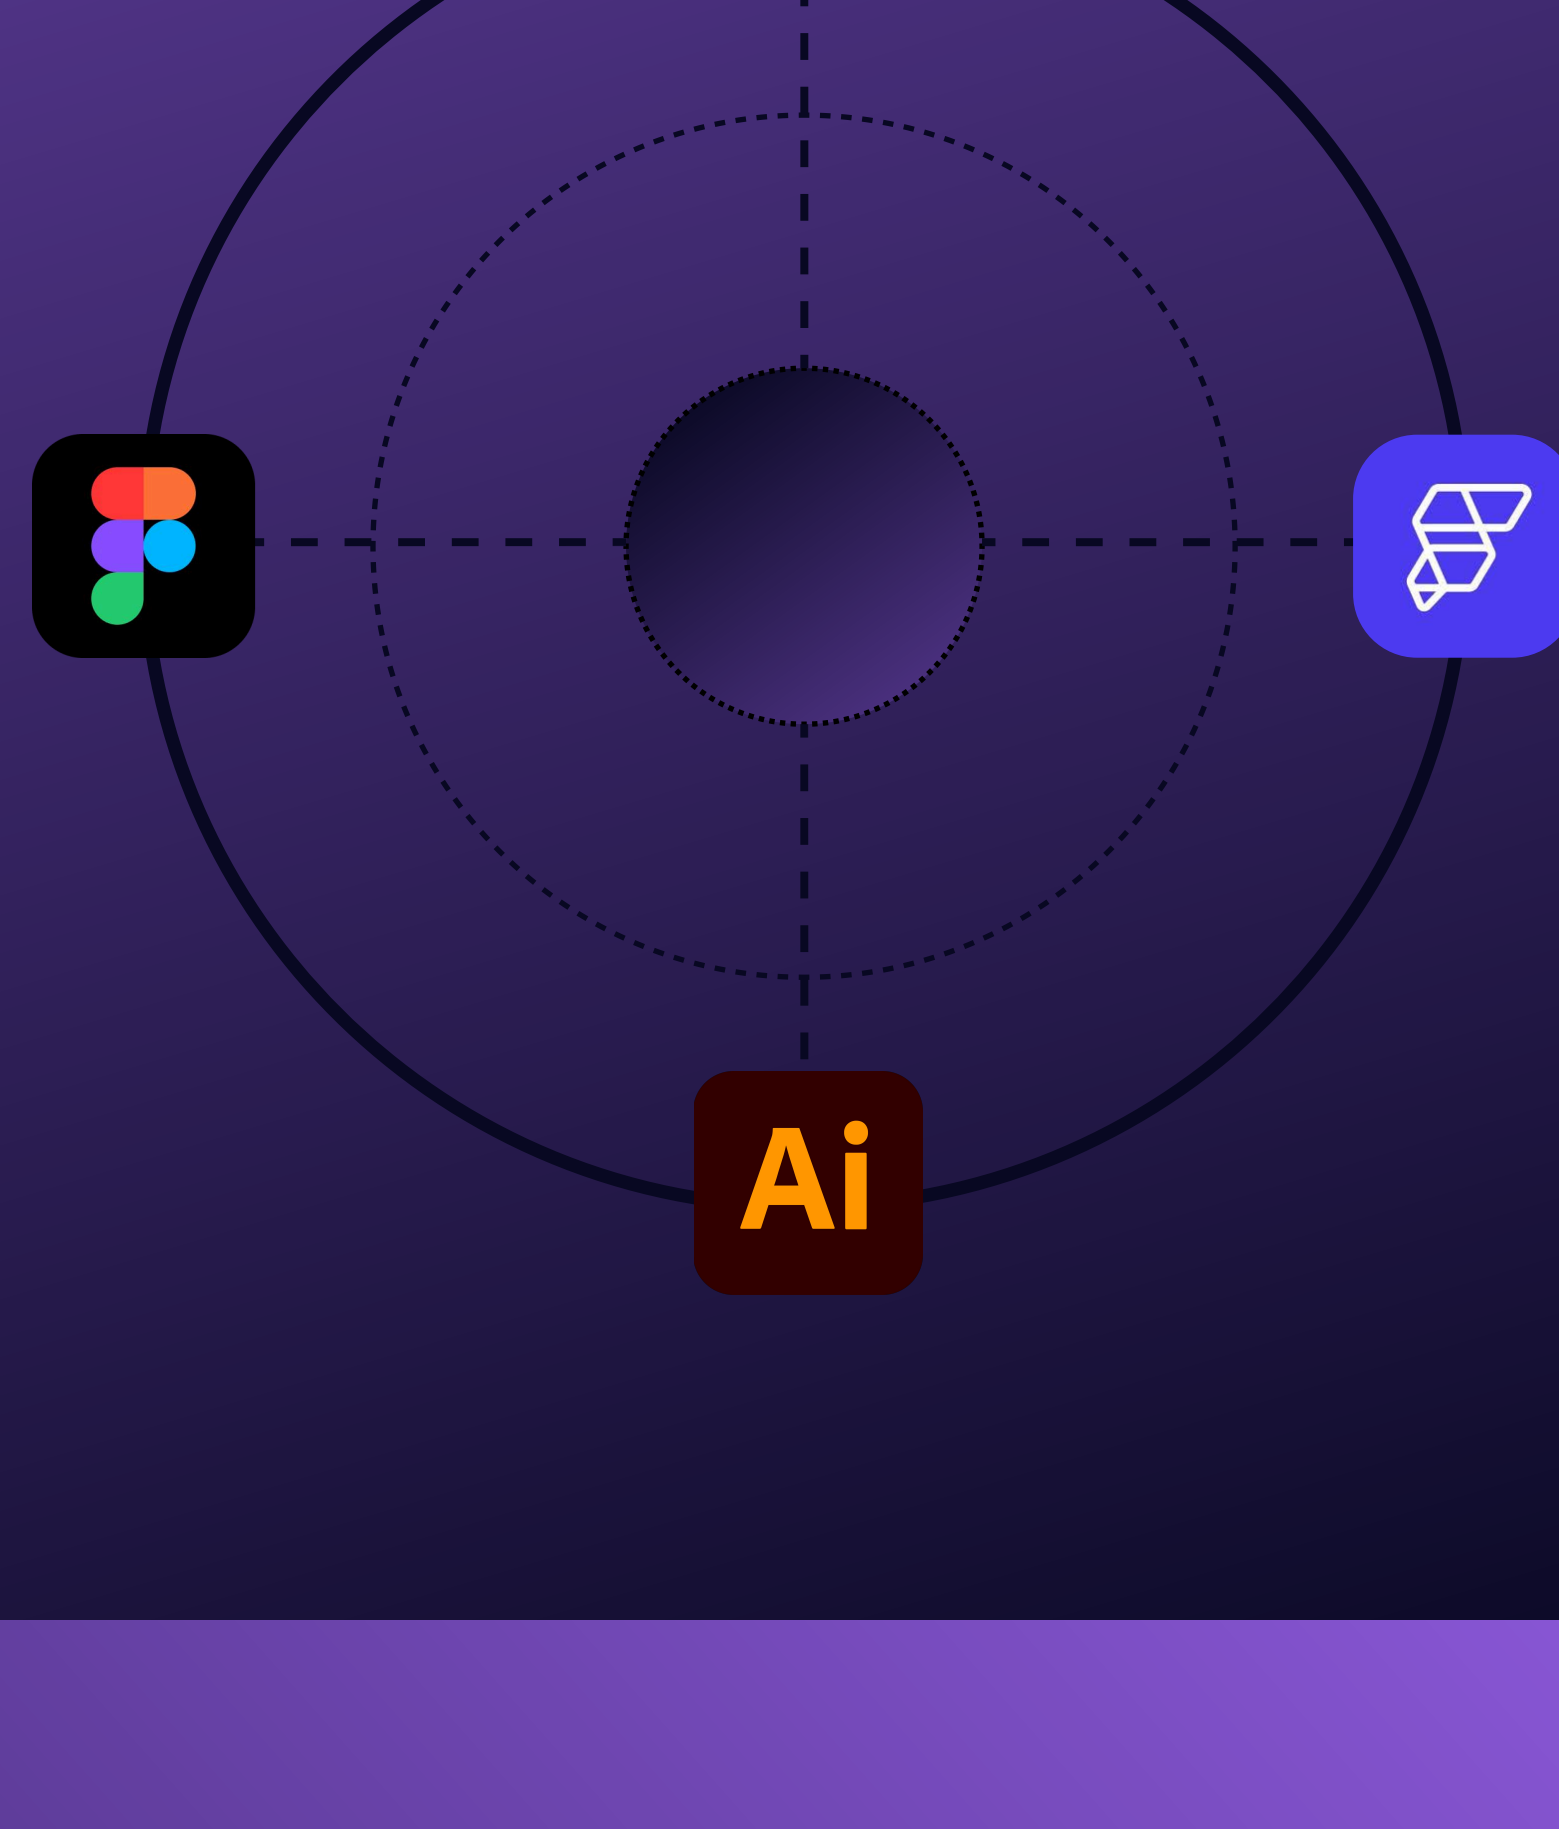

Year 2025 Industry fintech

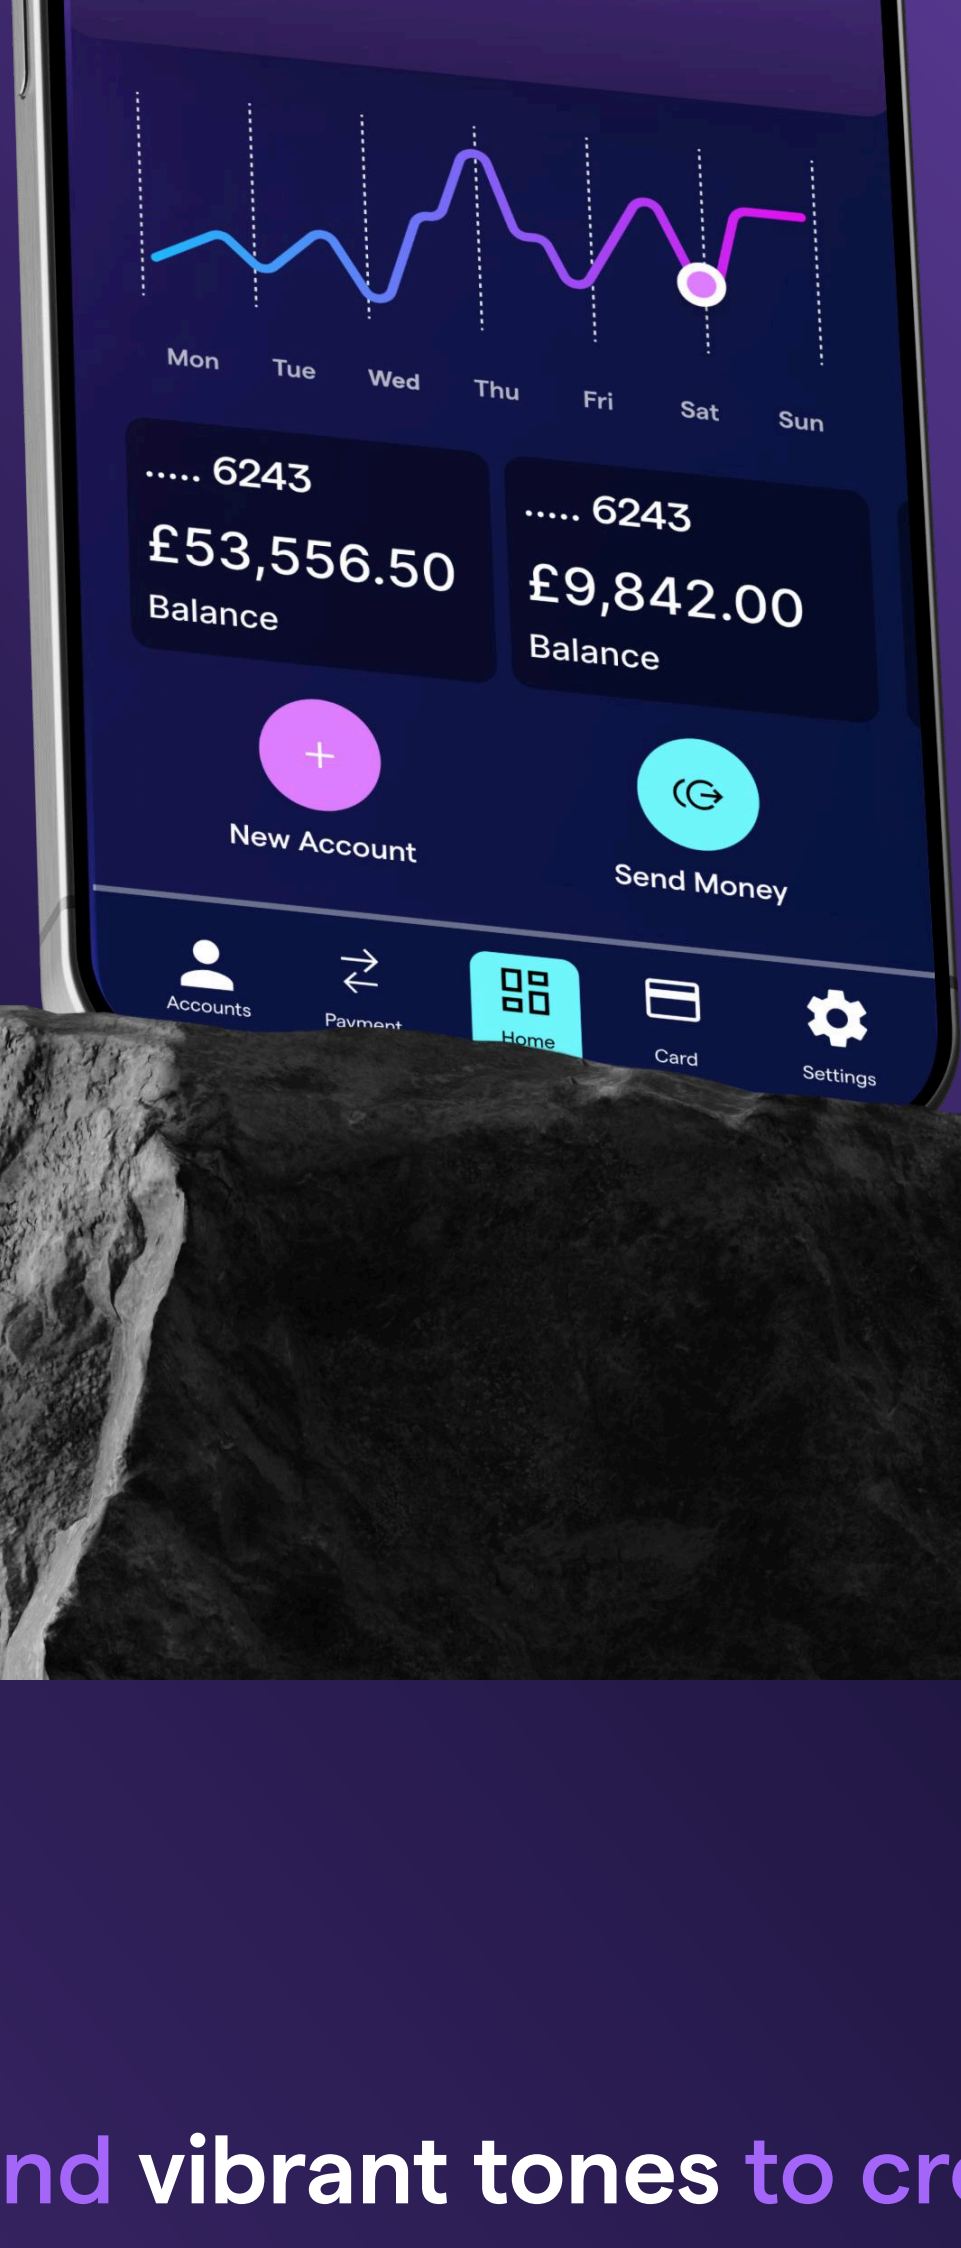

Tools

Tools from basic hand instruments to advanced digital applications enable people to work more efficiently. They save time, enhance capability, and simplify complex tasks, making work faster and more effective.

- ✓ Figma
For interface design, prototyping, and collaborative feedback
- ✓ Firebase
- ✓ Flutter Flow

Frontier Pay

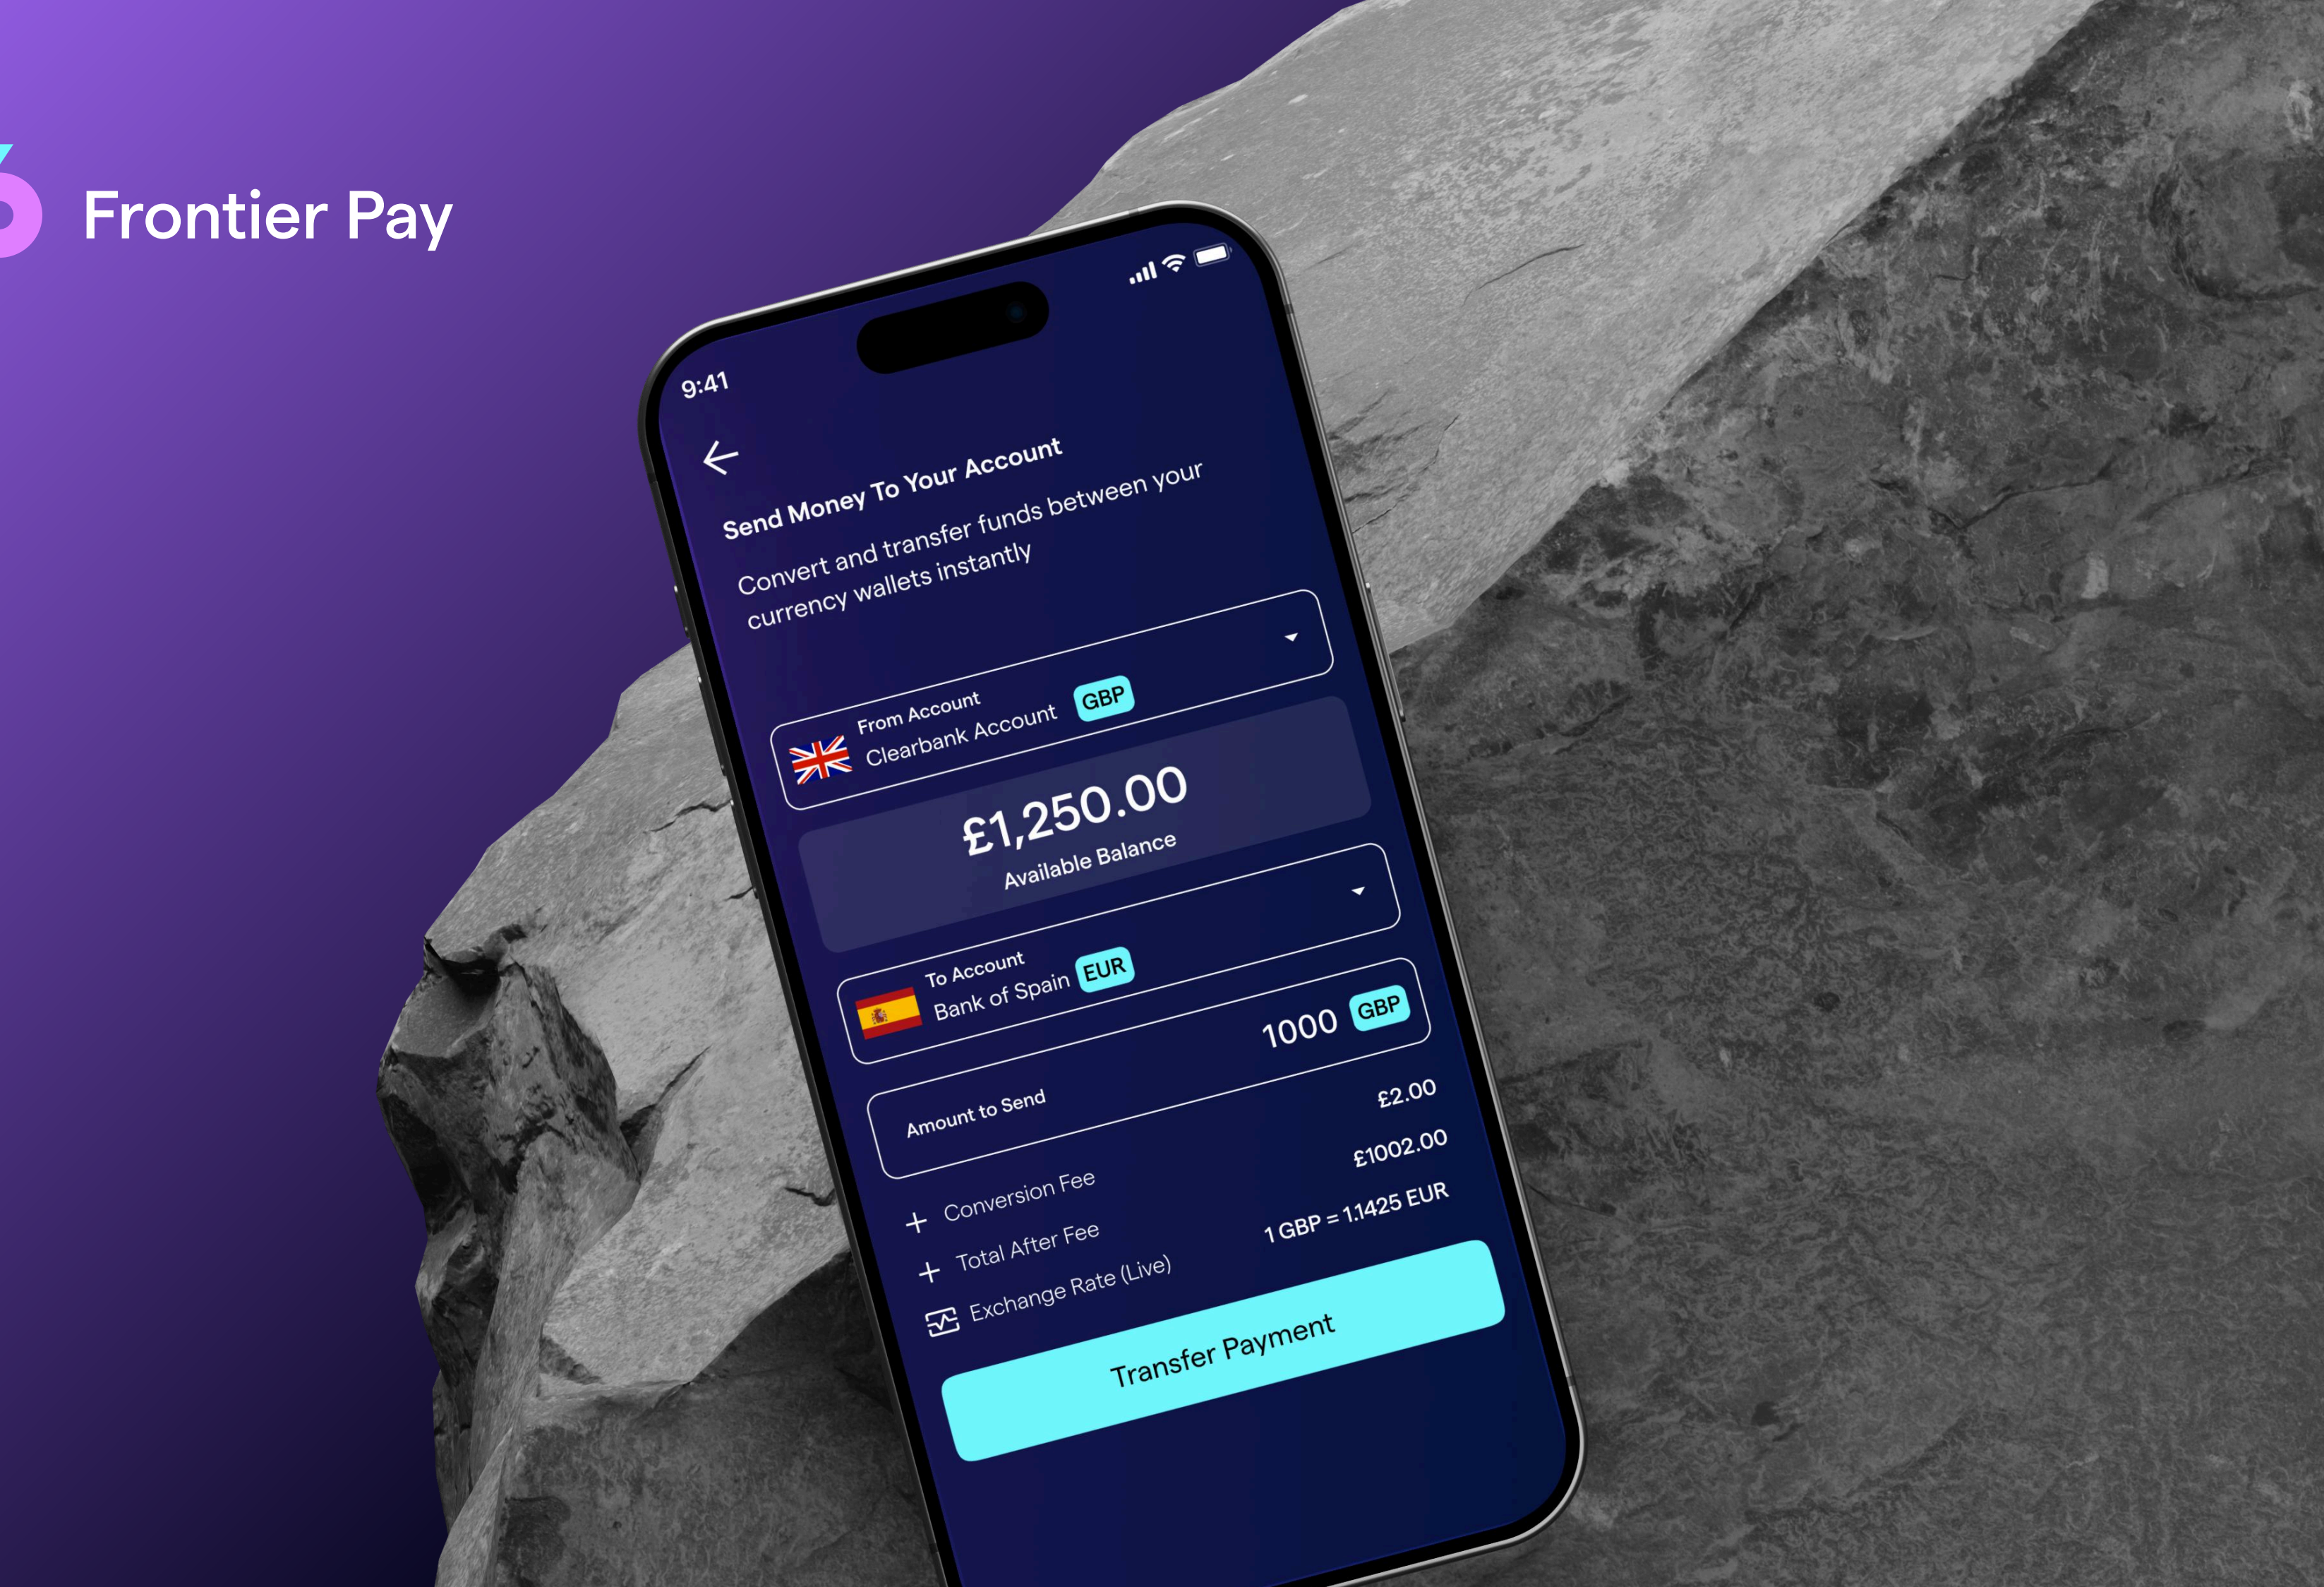

Typography & Color

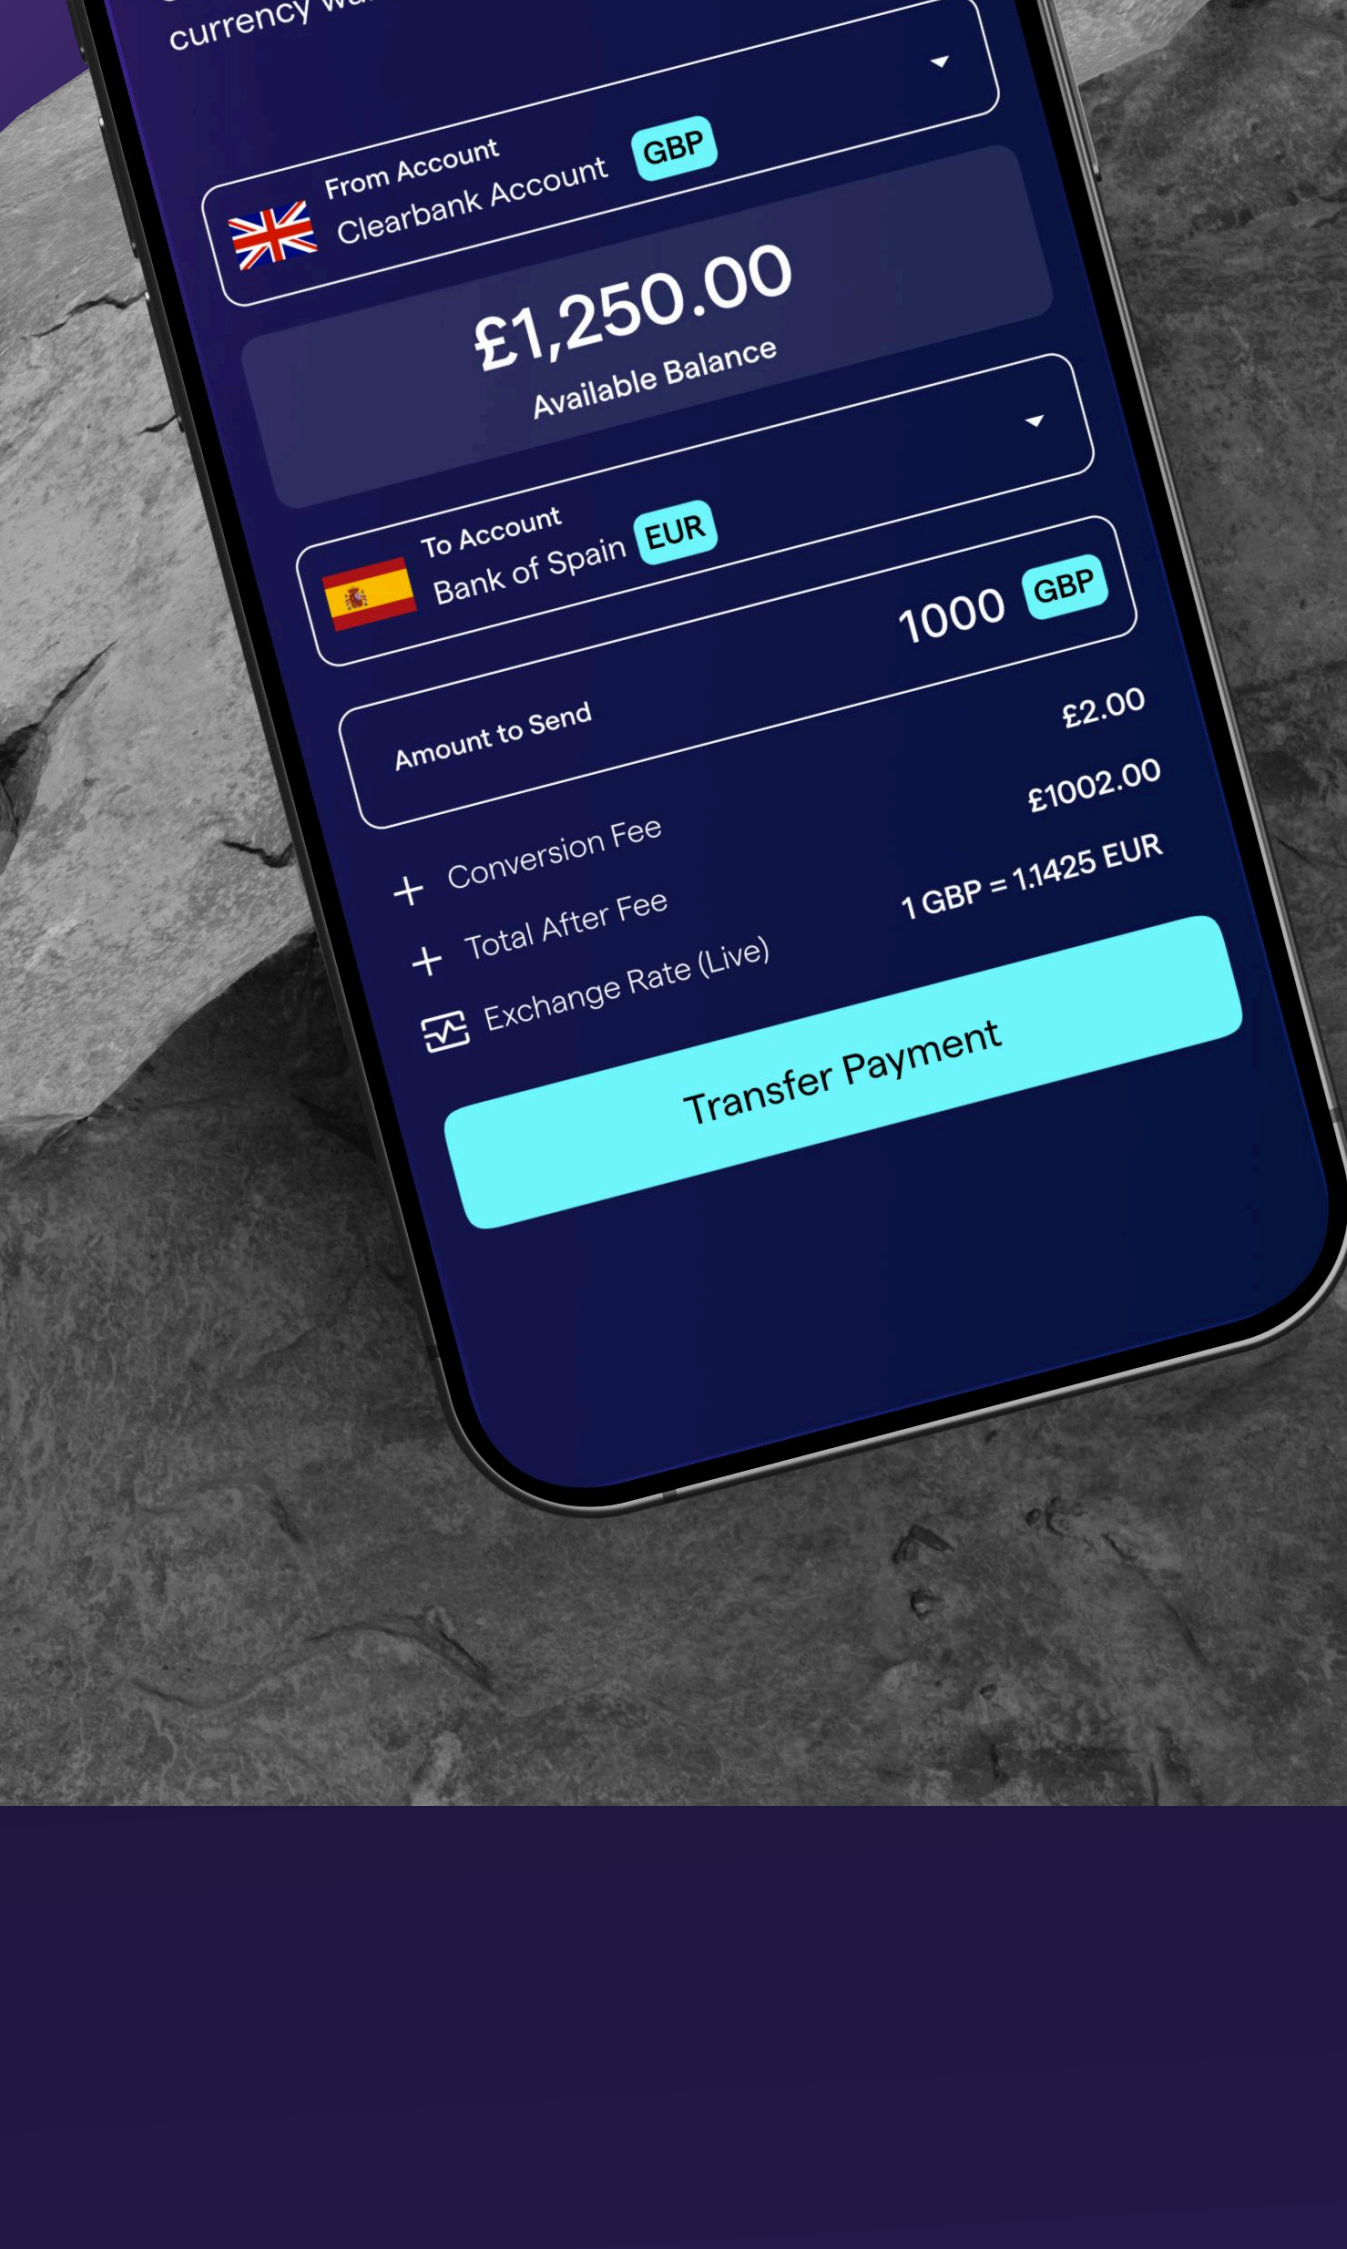

Our design blends calming and vibrant tones to create a sense of trust and engagement, paired with modern, easy-to-read typography that elevates both user experience and visual appeal.

UI Design

Onboarding Screens

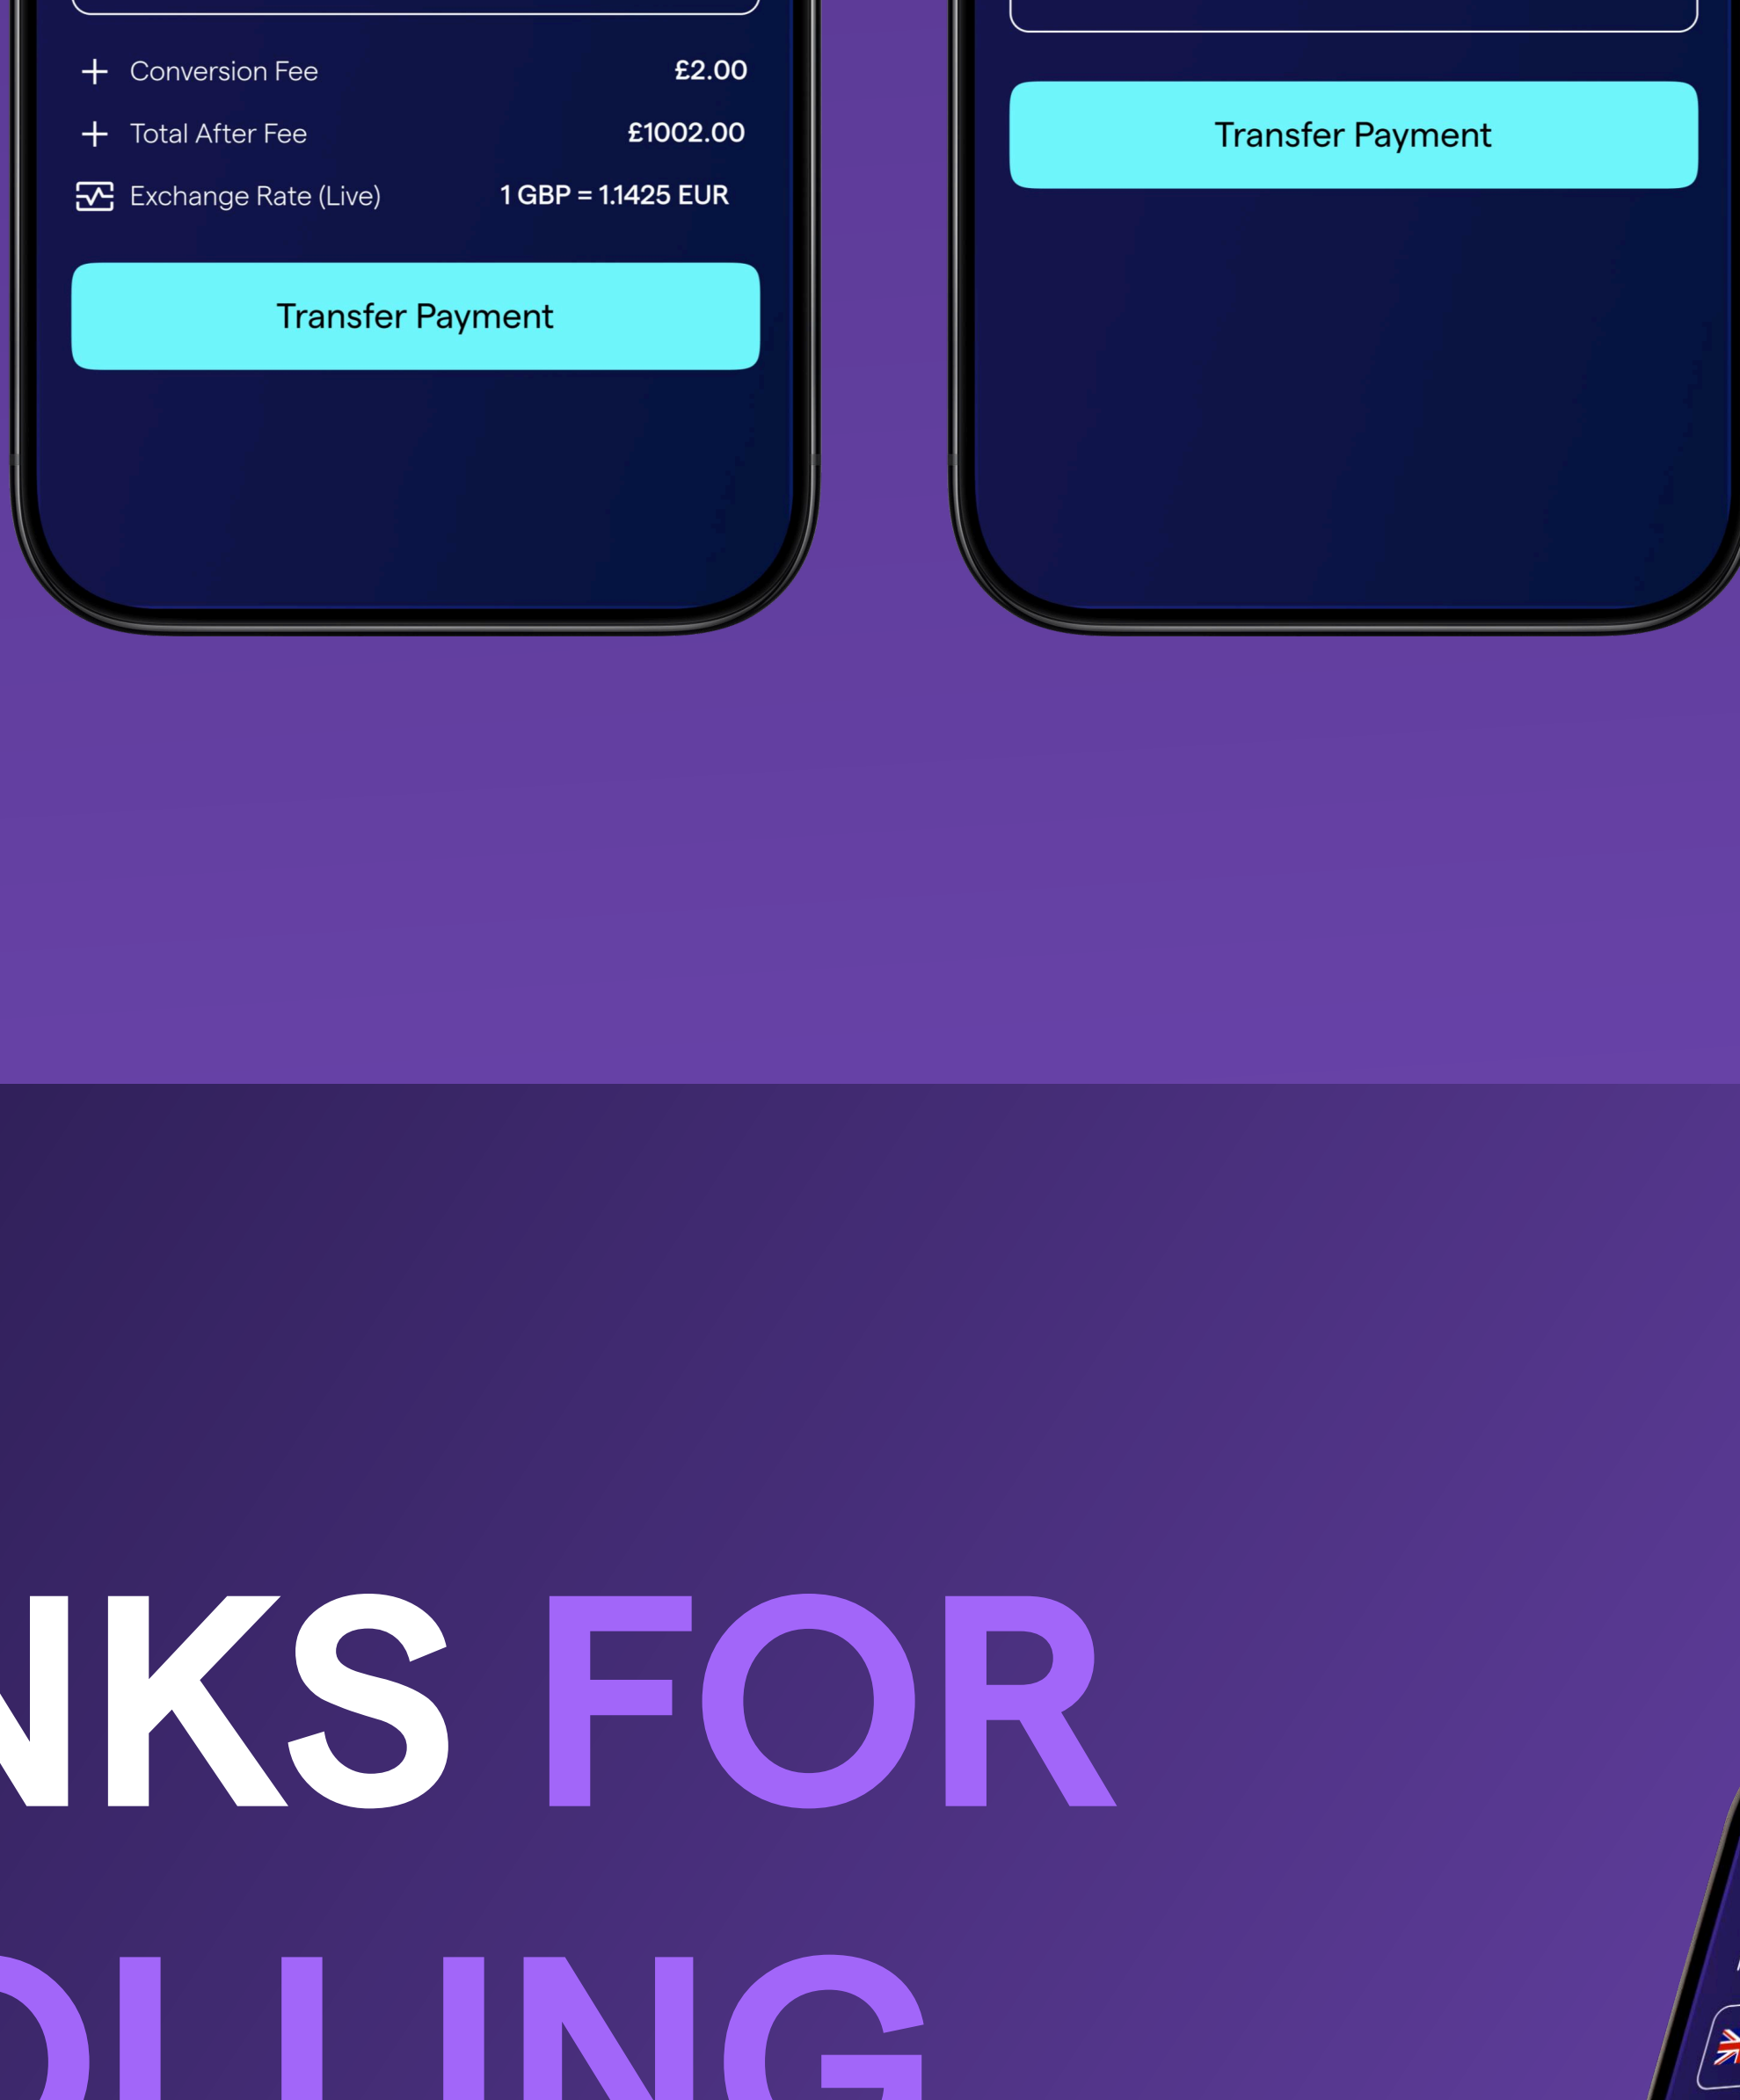

Home Screens

The Frontier Pay home screen serves as a smart financial hub, giving users quick access to balances, transactions, and card controls. Clear sections make it easy to manage cards, send money, and handle everyday banking seamlessly.

Payment Method Screens

The Payment Method section lets users manage how their cards are used across various channels.

They can enable or disable options like ATM, online, and international transactions for secure and flexible spending.
